Score: 18.20 / 20

PROFILE

Full-stack developer who builds fast, scalable products across web, desktop, and mobile. Since 2024, I have delivered 10+ projects with 5+ collaborators across 25+ technologies, from databases and APIs to polished user interfaces. I focus on clean code, performance, and systems that stay simple.

EXPERIENCE

Full-stack Developer
2024 – Present

Freelance & Collaborations · Remote

- Design and build web, desktop, and mobile products from first commit to production, including Docker-based deployment.
- Work with developers and clients on shared codebases, delivering on deadlines and adapting quickly to feedback.
- Build typed APIs, databases, and interfaces focused on speed, clarity, and maintainability.
- Follow a clear process on every project: discover, design, develop, deploy.

SELECTED PROJECTS

Mediora
2026

Healthcare Booking Platform

Booking platform with doctor verification, real-time availability, paid appointments, and secure messaging between patients and doctors.

Library Management System
2026

Bookstore API

Typed API with catalog search, stock-aware orders, acquisition requests, comments, and a clean admin surface.

Management System Landing Page
2026

Product Website

Product landing page built around a clear story and a strong trial conversion path.

Personal Portfolio
2026

Next.js Website

Content-driven portfolio with a command menu, light and dark themes, and a contact workflow powered by Resend.

ADDITIONAL

- **Content creator:** share development content on social media.
- **Collaborator feedback:** described by teammates as committed, hardworking, open to feedback, and able to work well under pressure.
